

### Evolution of homicides and accidents with firearms (2000-2016)<sup>1</sup>

Types of Firearms Used in Fatal Incidents 2000-2016

### Mass Shootings since 2000<sup>2</sup>

#### Alphen aan den Rijn, April 2011<sup>3</sup>

Mall shooting/ Perpetrator was diagnosed with mental illness  
Colt .45 pistol; Taurus 66 revolver;  
Semi-automatic Smith & Wesson  
M&P15-22 rifle  
Perpetrator committed suicide

#### Utrecht, March 2019<sup>4</sup>

Islamist terrorist motive  
Pistol with a silencer  
Perpetrator arrested

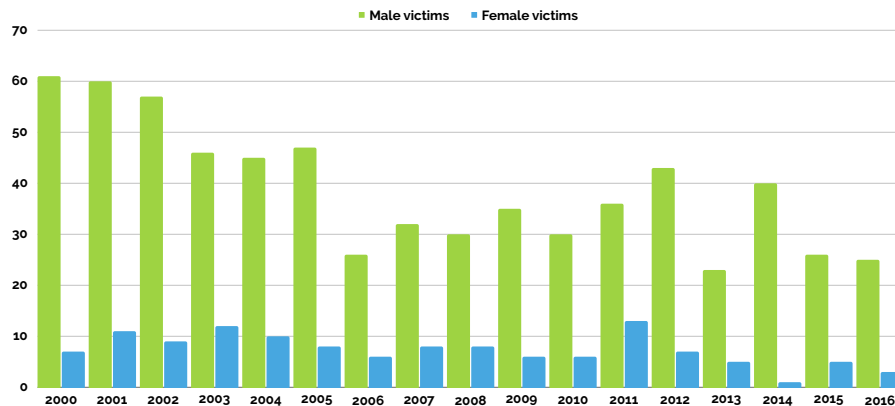

**Legend**

### Homicide firearm victims: 2000-2016

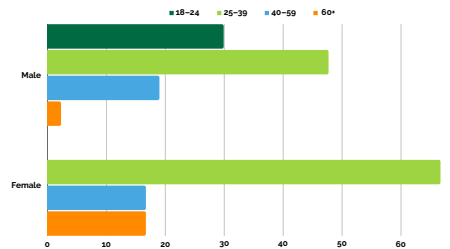

based on medical data<sup>5</sup>

#### Lethal Gun Violence by Gender

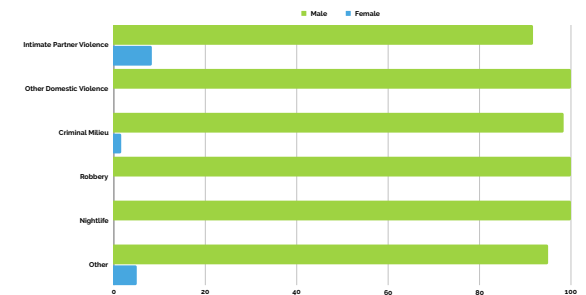

### Perpetrators of gun crime: 2015-2020<sup>7</sup>

#### Gender and age of perpetrators of gun homicides by percentage of known cases

Out of 187 lethal shootings in total, 96.8% of the homicides were committed by male and only 3.2% by female.

#### Gender of gun homicide perpetrators by type of lethal gun violence

2. Literature offers no generally accepted definition of a "public mass shooting. For data collection purposes Sarah Watson's definition will be basis of categorisation for a mass shooting. However, the scope will be further widened to include multiple perpetrators, "shootings that occur in the public and/or semi-public space, perpetrated by one offender and resulting in three or more randomly selected victims, with at least one fatality. The term victim refers to those fatally shot and those injured; however, it does not include the perpetrator". ### Trafficking

Although the Netherlands is not a firearms manufacturer, its geographical position makes it both a destination and a transit country<sup>15</sup> Firearm experts estimate that while weapons are trafficked further to Belgium, the United Kingdom, and Ireland, most of the firearms illegally entering the country are sold domestically.<sup>16</sup>

Firearms trafficking in the Netherlands follows the so-called “ant-trade” smuggling model, meaning small-scale and on-demand. Open borders in the Schengen Area of the European Union facilitate traffickers to move small amounts of firearms undetected.<sup>17</sup> Additionally, with the rise of e-commerce, the use of parcel shipments from abroad with firearms bought from the dark web is the new method of gun smuggling into the Netherlands. Usually, weapons are shipped in parts, and since shipments are concealed, customs checks are limited.<sup>18</sup>

The big price differences in firearms commerce across Europe make the Netherlands an interesting market for illicit firearms. Traffickers take advantage of the lucrative drug market to sell good-quality drugs, that can be bought cheaply in the Netherlands, in countries where guns are cheap and drugs are expensive.<sup>19</sup>

### Possession

According to various sources, firearms licenses in the Netherlands have increased from the period of 2009 to 2015 (61,663 to 72,086). This increase primarily occurred from 2011 to 2014 (61,663 to 72,645).<sup>20-22</sup>

The number of registered firearms in the Netherlands fell to 197,357 in 2018. This was its lowest figure since 2007 and can be attributed to the increasingly controlled gun laws since the Alphen aan den Rijn mass shooting in 2011.<sup>23</sup>

Most legally owned firearms in the Netherlands can be found on the Wadden Islands and in the eastern Netherlands. Relatively few weapons are registered in the major cities.<sup>24</sup>
