² Literature offers no generally accepted definition of a "public mass shooting". For data collection purposes Sarah Watson's definition will be basis of categorisation for a mass shooting. However, the scope will be further widened to include multiple perpetrators, "shootings that occur in the public and/or semi-public space, perpetrated by one offender and resulting in three or more randomly selected victims, with at least one fatality. The term victim refers to those fatally shot and those injured; however, it does not include the perpetrator". Watson, S., (2022), Mass shootings, fatality thresholds and defining by numbers: Political and social consequences, *Criminology & Criminal Justice* vol. 1 no. 19, pg. 4.

Seizures

Types of firearms seized ⁶

Context of seizures 2016-2020 ⁷

Trafficking

Slovenia, along with Austria, are known to be focal transit points for firearms trafficking. The smuggling route via Slovenia is one of the three typical land routes known to be used in the trafficking of firearms from the Western Balkans to the rest of Europe.⁸ Weapons are trafficked to and from the Balkans via Slovenia to Austria and Germany or via Slovenia to Italy and other Western European countries.⁹

Although Slovenia experienced conflict in the 1990s, there was only brief fighting between the Yugoslav People's Army and the Slovenian territorial defense. Thus, the levels of conflict with legacy firearms comparable to the Western Balkans are believed to be low in Slovenia.¹⁰

Possession

The Small Arms Survey estimates that, as of 2017, there are 324,000 firearms held by civilians in Slovenia.¹¹ Of those in circulation, 127,094 are registered, while the remaining 196,906 are considered unregistered. Firearms that are held illegally in Slovenia are believed to result, mostly, because of problematic internal control after the brief fighting in 1991.¹²

Following the country's declaration of independence, there was a decade, between the 1990s and 2000s when large quantities of SALW were consistently confiscated in Slovenia.¹³

When Slovenia became a member of NATO and the EU in 2004, there was a concerted effort to regulate firearm possession and trafficking, which resulted in systematically lowering levels of firearm seizure. However, soon after, especially after 2010, higher numbers of firearm seizures appear in Slovenia's national statistics.¹⁴
